DETAILED ACTION

Claims 35-43 are pending. The Amendment filed 4/17/03, Paper No. 13, cancelled claims 15-21 and added claims 35-43. Claims 22-34 are withdrawn from consideration, as they are directed toward non-elected subject matter.

Applicant's arguments and declaration with respect to claims 35-43 have been considered but are moot in view of the new ground(s) of rejection. In regard to the declaration, the Examiner respectfully directs Applicant to the requirements for showing unexpected results. It is applicant's burden to demonstrate unexpected results over the closest prior art. See MPEP 716.02, also 716.02 (a) - (g). Furthermore, the unexpected results should be demonstrated with evidence that the differences in results are in fact unexpected and unobvious and of both statistical and practical significance. *Ex parte Gelles*, 22 USPQ2d 1318, 1319 (Bd. Pat. App. & Inter. 1992). Moreover, evidence as to any unexpected benefits must be "clear and convincing" *In re Lohr*, 137 USPQ 548 (CCPA 1963), and be of a scope reasonably commensurate with the scope of the subject matter claimed, *In re Linder*, 173 USPQ 356 (CCPA 1972).

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/17/03 has been entered.

Claim Rejections - 35 USC § 102

Art Unit: 1617

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Yu et al.

(Effects of 17O-Labeled Water. . .FKBP/Ascomycin Complex, Jn. Of Magnetic Resonance).

Yu teaches the effects of 17 O-labeled water on the backbone amide 1H relaxation rates of the FK506 binding protein (FKBP) and ascomycin, wherein proteins consist of amino acid residues joined by peptide bonds, wherein the peptide bond combines a –CO with a –NH. It is respectfully pointed out that –14N is the main isotope in all nitrogen containing compounds. Disclosed is a composition comprising FKBP, ascomycin and H217O (solvent and drug delivery system). See pg. 218.

It is respectfully pointed out that the effects of (H2)17-O and 14-NH of an amino acid on the proton bonded thereto are an inherent property of the compound, as a compound and its properties are inseparable. In re Papesch, 315 F.2d 381, 137 USPQ 43.

It is further respectfully pointed out that since the binding protein/ascomycin complex is the only medicament, that the concentration of the active ingredient in the drug composition is equal to the concentration of the active ingredient in the medicament.

Regarding Applicant's limitations toward the relaxation effect spreading through the exchange of a proton in a vital component of a target organ or tissue of a living body, it is respectfully pointed out that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably

Art Unit: 1617

distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). In the instant case, the composition of the prior art is able to perform the intended use. Thus, Applicant's limitations toward the intended use are not given patentable weight.
